## FROM BIODIVERSITY DATA TO REPORTING

Presenting concrete approaches and case-studies illustrating a sustainable and cost-efficient path from biodiversity data acquisition, indicator development, visualization and delivery to national reporting.

Organised by the GEO BON Secretariat, GBIF Secretariat & NatureServe

Program and list of speakers:

**From Biodiversity Data to Reporting** (Chair: Laetitia Navarro – GEO BON)

- 1. Developing Biodiversity Observation Networks and Essential Biodiversity Variables to support users' needs** - Henrique Pereira - GEO BON (10')
- 2. From biodiversity monitoring to the 6th National Report – An example from China** - Haigen Xu - NIES (10')
- 3. Data mobilization and management in support of biodiversity reporting** - Tim Hirsch - GBIF (10')
- 4. The Biodiversity Intactness Index - an EBV-derived indicator of community composition** - Adriana de Palma - National History Museum (10')
- 5. The Species Status Information Index, Species Habitat Index and Species Protection Index** - Walter Jetz - Map of Life (10')
- 6. The Protected Area Representativeness & Connectedness Indices** - Simon Ferrier - CSIRO (10')
- 7. The Biodiversity Indicators Partnership (BIP) Dashboard: Tracking Trends for Conservation** - Healy Hamilton - NatureServe (10')
- 8. Round table – Q&A and Discussion** (20' - moderator: Hyejin Kim – GEO BON)

*Lunch and drinks will be offered*
